SUMMARY

- Experience working with RESTful API's, React, and NodeJs. Developed multiple websites from the ground-up using bootstrap and using a CMS such as WordPress.
- Strong familiarity with WordPress and Shopify. Built and provided technical support for various websites on these platforms which saw a jump in their site performance and accessibility ratings.
- Strong interpersonal skills which have seen me work closely with multiple teams that resulted in efficient projects and on schedule deliverables.
- Willing to undertake new and challenging tasks as well as learn new technology stacks.

PROFESSIONAL SKILLS

- | | | |
|-------------------------------|--------------------|-----------------|
| ▶ Strong Communication Skills | ▶ MySQL | ▶ HTML/CSS/ES6+ |
| ▶ Problem Solving Skills | ▶ REST APIs/JSON | ▶ JavaScript |
| ▶ SEO & Google Analytics | ▶ NodeJs/ExpressJs | ▶ ReactJs |

PROFESSIONAL EXPERIENCE

Full Stack Developer | Freelance | August 2020 – Present

Worked closely with clients to implement various designs and alterations to a **Shopify** or **WordPress** theme. Added custom JavaScript in certain areas to solve unique problems that could not be done through the theme. Found creative solutions to satisfy clients requests. Made sure their websites were accessible by following **WCAG guidelines** and running different tests using tools such as WAVE and Webaim. The target was to make each website at least **level AA compliant**.

Developed multiple projects which utilized fetch requests to deliver dynamic content to the front end of the website. Some of these APIs include Spotify, Yelp, LocationIQ, Twitter, etc. Currently developing a project which sees me build my own **API** as well as the backend which it interfaces with. The project utilizes **ReactJs**, **ExpressJs**, Nodejs and **MySQL**.

Occasionally provided advice on the **visual structure** of the clients' website, making sure **user experience** was at the forefront of every design decision that was made. I also made **design** decisions based on the information provided by **google analytics** which saw unique visitors increase by about 23% and bounce rate increase on expected pages such as the contact page and decreased on pages such as the home page.

EDUCATION

- **Bachelor's Degree** in Computer Science, University of Toronto, 2015 - 2020.
- **Diploma** in Digital Communications, Sheridan College, 2016 - 2020.
