SUMMARY

- Experience working with API's as well as developing REST APIs, relational databases, proxy servers and client-server architectures.
- Developed multiple websites from the ground-up using bootstrap and CMS's such as WordPress and Shopify as well as provided technical support for various websites on these platforms which saw a jump in their site performance.
- Strong interpersonal skills which have seen me work closely with multiple teams that resulted in efficient projects and on schedule deliverables.
- I excel in a fast-paced environment and can handle multiple responsibilities at once.

PROFESSIONAL SKILLS

- | | | |
|-------------------------------|-----------------|---------------------|
| ▶ Strong Communication Skills | ▶ MySQL | ▶ HTML/CSS/ES6+ |
| ▶ Problem Solving Skills | ▶ REST API/JSON | ▶ JavaScript/Python |
| ▶ SEO & Google Analytics | ▶ Node/Express | ▶ React |

PROFESSIONAL EXPERIENCE

Web Developer | Freelance | August 2020 – Present

Worked closely with clients to implement various designs and alterations to a Shopify or WordPress theme. Added custom JavaScript in certain areas to solve unique problems that could not be done through the theme. Found creative solutions to satisfy clients requests. Made sure their websites were accessible by following WCAG guidelines and running different tests using tools such as WAVE and Webaim. The target was to make each website at least level AA compliant.

Developed multiple projects with client-server architectures that utilized fetch requests to deliver dynamic content to the front end of the website. Some of these APIs include Spotify's Web API, Yelp's Fusion API, LocationIQ, Twitter, etc. I made sure these projects were forward thinking by following industry best practices, resolving project issues in an efficient way and ensuring a positive experience for the users.

Occasionally provided advice on the visual structure of the clients' website, making sure user experience was at the forefront of every design decision that was made. I also made design decisions based on the information provided by google analytics which saw unique visitors increase by about 13%.

EDUCATION

- **Bachelor's Degree** in Computer Science, University of Toronto, 2015 - 2020.
- **Diploma** in Digital Communications, Sheridan College, 2016 - 2020.
