SUMMARY

Recent graduate with a degree in computer science and a certificate in digital communications. Over a year working with clients on WordPress as well as Shopify and transforming design concepts into working apps using web markup and frameworks such as HTML, CSS, JavaScript, and React. Over 3 years of academic experience developing websites from the ground-up by utilizing bootstrap and CMS's such as WordPress. Looking for an opportunity to work in a challenging and collaborative environment that promotes diversity and inclusivity. I excel in a fast-paced environment, have a passion for problem solving and am very eager and willing to learn new technologies.

PROFESSIONAL SKILLS

▶ Responsive Design	▶ RESTful API	▶ JavaScript
▶ Strong Communication Skills	▶ Styled Components	▶ HTML | CSS | ES6+
▶ Git	▶ TypeScript	▶ React | Redux

PROFESSIONAL EXPERIENCE

Web Developer | Freelance | August 2020 – Present

- Collaborated with clients to implement various designs and alterations to a Shopify or WordPress theme. Periodically scheduled meetings where the website was discussed, and any feedbacks made were noted and implemented before the next meeting occurred.

- Found creative solutions to satisfy clients requests such as adding custom JavaScript and CSS in certain areas to solve unique problems that could not be done through the theme.

- Ensured websites were mobile friendly and accessible by taking a mobile-first approach and running tests using tools such as WAVE and Dyno Mapper.

- Occasionally provided advice on the visual structure of the clients' website, making sure user experience was at the forefront of every design decision that was made. Also, made design decisions based on current trends and data provided by google analytics which saw unique visitors increase by about 13%.

- Developed multiple projects with client-server architectures and authentication that utilized the fetch API to deliver dynamic content to the front end of the website. Made sure these projects were forward thinking by building reusable code through the help of react components, writing scalable and efficient code, and testing the UX and UI designs for technical feasibility.

EDUCATION

- **Bachelor's Degree** in Computer Science, University of Toronto, 2015 - 2020.

- **Certificate** in Digital Communications, Sheridan College, 2016 - 2020.
